

A New Horizon

RIDE INTELLIGENTLY

A New Horizon

STRIVE TILL EXCELLENT

This is the spirit of AZTRON. The energy fired us up and still inspires us now. Although we lived through some unprecedented times over the pandemic, we truly value the precious freedom and our passion to watersports. We strive to break the limits in all fields, to boldly face the obstacles, and to push ourselves beyond the bounds. Ever progressing, always improving.

KEEP INSPIRING

Our goal is not only to develop the best equipment but above all, it is important to us at AZTRON to put people first. To motivate every rider to have the best time possible on the water, to inspire them to develop themselves further and to charge themselves with as much positive energy as possible while paddling, surfing and more.

SAFETY FIRST

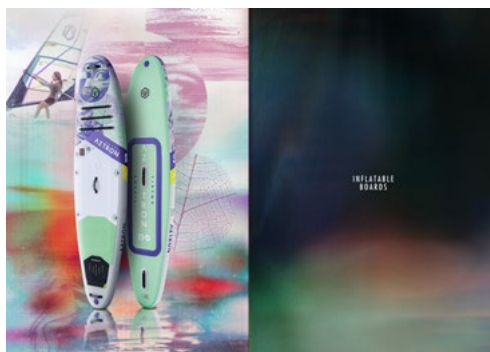

Safety is always in our heart. The No. 1 priority of our work is to make sure all Aztronauts return home safely after enjoying a great adventure. Proof to our commitment: all of our equipment is built to meet international safety standards and certified by well-recognized authorities.

MODERN TECHNOLOGY

Technology and innovations are at the center of all the designs we build. Over the past seasons, we've made some groundbreaking new advances in technology, the signature Double Chamber for iSUP, the foils and air wing tech, and the safety gears, our goal is to use the technology to make not only awesome products but to connect the community stronger than ever before.

BLISS OF NATURE

The breathtaking beauty of nature, and the bliss such beauty inspires, make up the unique charm of outdoor sports. All of our designs center around this mission — to bring the bliss of nature to our community members and to take them closer to the magnificent world surrounding us.

INFLATABLE BOARDS

Pushed by the spirit of excellence, we continue improving our most popular inflatable boards in the 2023 season. The Compact Series, a true hit since its launch, received a striking new style and is lighter and even more foldable this year, while the SUPER NOVA 11'0" evolved from all-round to touring outline. The high end, high performance Windsurf boards- SOLEIL stands for strong, light, superior, and the upgraded design put it a step above the rest.

COMPOSITE BOARDS

Composite boards are the summit of AZTRON technology and innovation. In this new season, MARTIAN is switched to a 2.0 version as a pro race SUP at 14'0", a bold move towards the podium. As waves moving, the CYGNUS surfboard with a fresh new look is here for the novices and clubs. We created this first surfboard with passion of ocean and freedom, and we continue striving for the same vibes in the new chapter.

FOIL COLLECTION

The FALCON lineup welcomes new members to cover the needs of every foiler. The Air 5'4" completes the air range with its newest size. It's a versatile board without compromising in performance. On the hard board side, the previous 6'6" is shortened to a more compact size at 6'3" and a more versatile model 5'0" is added into the line. Many exciting features such as bottom handle, multiple footstrap options, and concave bottom are added to spice up the trip. Defy gravity on the back of the FALCON!

WING AND FOIL

Over the past seasons, we've made some groundbreaking new advances in technology, one such example is the Air Wing and Foils. This year, more wing sizes are available to tailor to the rider's skill and wind condition. The outline of foil, especially 1450 combo has been updated to a higher aspect model, for more performance and to carry you far and beyond the horizon.

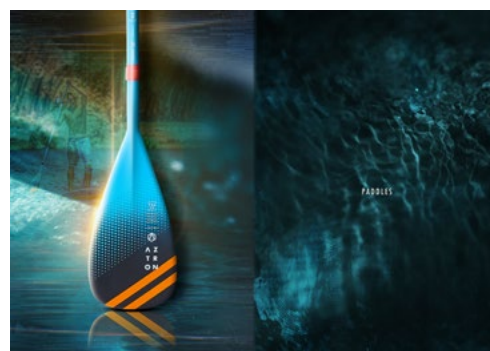

WHAT'S

NEW?

SURFSKATE

The fan-favorite surfskate line keeps expanding! This year, two more sizes, IN.SCAPE 32 and FACE 33 are added in the range. Both boards are designed to take riders from entry to progressing but with variation in deck and tail technology. BANG 29, as its name suggests, is born to break limit. More radical than ever, this board turns the street into your stage. The year 2023 also sees our first danceboard, which aims to smooth your pathway into the world of longboard dancing. Coordinate your foot works and release some vibe!

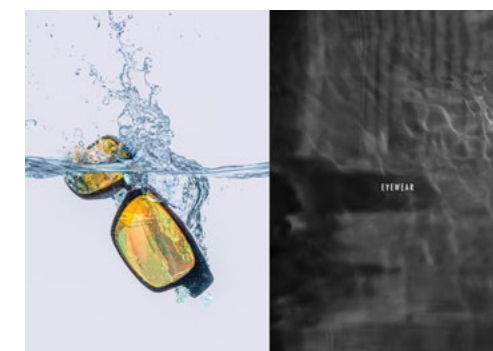

ACCESSORIES

We are obsessed with every detail. So every year AZTRON seeks innovative ways to improve not only essential equipment but accessories as well. The standard SUP gear bag is upgraded for improved comfort of use, based on the feedbacks we heard. The safety leash in 10' and 9' gives extra safety for your paddling journey. In addition, skateboard backpacks with cool looks and easy carrying design are now available!

SAFETY EQUIPMENT

Safety is always in our DNA! For the new season, the neoprene safety vest- CHIRON and VESTA are received with new design and born to boost your confidence on water. For helmets, the new H9 water helmet is introduced for all riders to enjoy the sensation of flying above water. HS7 is a new endeavor in the Safety Gear Collection. As the first land helmet in this line, it maximizes protection for our skaters as they display their own vibes.

APPAREL & WATER WEAR

Blend functionality into style. This collection covers a wide range from professional water wear to beach essential. From head to toe, AZTRON got you fully armed against the harsh weather and geared up for fun. We even went one step further, the Floating Sunglasses series is now available to protect your vision under the most dazzling sunshine.

TEAM

Meet our team riders who represent the adventurous spirit of AZTRON. Our team riders hail from different parts of the world and at different skill levels, but they are united by the same passion for sports, nature and exploration. They are an inspiration to our work and keep en-couraging people to join these amazing sports.

BOARDS

INFLATABLE BOARDS TECHNOLOGY / MATERIAL AND STRUCTURE

	AIR COMPACT RANGE	TOURING/SPECIALTY RANGE	ALL-ROUND RANGE	RACE RANGE
OUTER PVC SHELL	DURABLE AND LIGHTWEIGHT Single layer reinforced PVC outer shell.	DOUBLE LAYER FUSION Top and bottom of the boards is directly machine heat laminated to the drop-stitch core with high density PVC under controlled conditions. The result gives an ultimate quality, stiffness, bonding and light-weight material. The overall stiffness is increased by 30%.	DURABLE AND LIGHTWEIGHT Single layer reinforced PVC outer shell	DOUBLE LAYER FUSION + CARBON INLAY Top and bottom of the board is directly machine heat laminated to the drop-stitch core with high density PVC under controlled conditions. The RACE range is built with a 3K carbon rail and inlay to further strengthen the outline and rigidity.
DROP-STITCH CORE	 I-Stitching Drop-Stitch core is a standard woven support fabric with thousands of polyester threads create a super strong and high pressure inflatable material.		 X-Stitching Drop-Stitch core applies on the All-Round iSUP is an advanced weave pattern provides a unique structure for the polyester yarns. The X-Stitching core offers good strength, and its new weave pattern contributes to lower overall weight by 20% and better flexibility.	
DOUBLE CHAMBER CONSTRUCTION AND AIR DISTRIBUTION	 56cm VS. REGULAR 93cm			
	<ul style="list-style-type: none">• Inner and outer chamber offers 30:70 air distribution• Gives 60L extra buoyancy of total board floatation		<ul style="list-style-type: none">• Inner and outer chamber offers 50:50 air distribution• Gives at least 150L extra buoyancy of total board floatation

DOUBLE CHAMBER, DOUBLE SAFETY

Built with two separate air chambers, the AZTRON Signature and LITE dual-chamber construction offers a 30:70 or 50:50 air distribution between the inner and outer chamber. The second chamber offers a secondary floatation for any emergencies while the sidewalls act like I-Beams make board stiffer. The inner chamber is wisely positioned at the standing area and continuing towards the front. This effectively reduces the deflection about 1.5-2cm comparing to other inflatable SUP in the market.

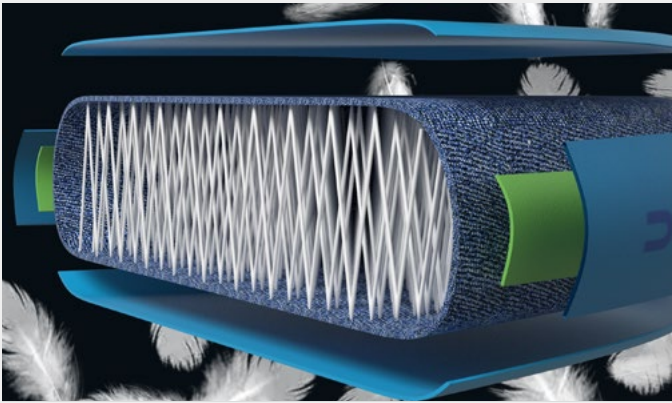

CUSTOMIZED DOUBLE VALVES

All AZTRON's inflatable SUPs are equipped with customized high pressure valves specially designed for the Double Chamber construction. With a relative smaller diameter than regular air valve, the unique AZTRON valve allows you to prevent damages caused by over inflation. The performance yet is not compromised by this special design.

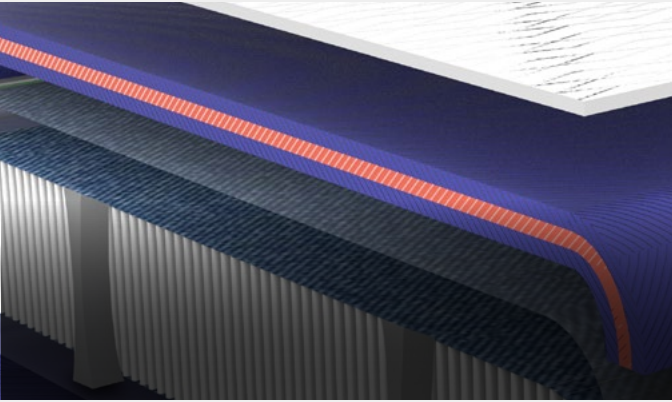

PREMIUM DROP-STITCH CORE

The drop-stitch core is the heart of every AZTRON inflatable SUP. The core is built with two pieces of polyester woven support fabric with thousands of fine polyester threads. Each base material is about five to ten feet in width about approximately 400 needle heads per piece to finish the setup. Each needle sews a continuous and evenly spaced thread, back and forth between the top and bottom base fabric, locking them into an incredibly strong unit. This innovative process creates a super strong inflatable material.

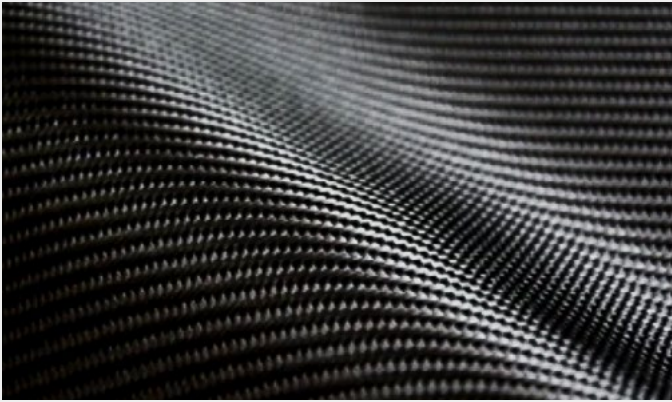

LIGHTWEIGHT, YET BUILT TOUGH

AZTRON's new woven X-Stitching drop-stitching technology provides a advanced structure of the polyester yarns. The new weave has a unique and less knitting method than the traditional I-Stitching. This gives the board more strength, yet not compromising the board stiffness and helping to reduce the overall weight by at least 20%. We applied the Ultra-Light drop-stitch core on the All-Round and Race Range.

DOUBLE LAYER FUSION PVC OUTER SHELL

The Double Layer Fusion TECH is our premium construction. Featuring a second PVC layer, which is machine welded directly to the drop-stitch core and around the I-Stitching or X-Stitching material. The benefits of the Double Layer Fusion construction when compared to the standard Double Layer Glue construction is a 20-25% reduction in overall weight, and around 25-30% increase in stiffness. Simply the best inflatable technology out there!

CARBON BAND LAYER

A new 3K Carbon Band layer is applied on the deck area of the RACE SUP - METEOR and METEORLITE. The innovative Carbon Fiber extra layer offers additional stiffness and performance to the competitive range.

NOVA 10'0"

ITEM NO. AS-022

Safety and performance folded into one small backpack. This is the very definition of the Compact Collection. Through reduced traction pads and the Double Chamber Lite Tech, it now offers even more convenience in packing with uncompromised function and revamped graphic design. For the 2023 season, the SUPER NOVA 11'0" in the range has been given a outline upgrade to touring SUP, reducing the weight and increasing the performance of the board. Pack smaller, travel lighter!

SIRIUS 9'6"

ITEM NO. AS-512D

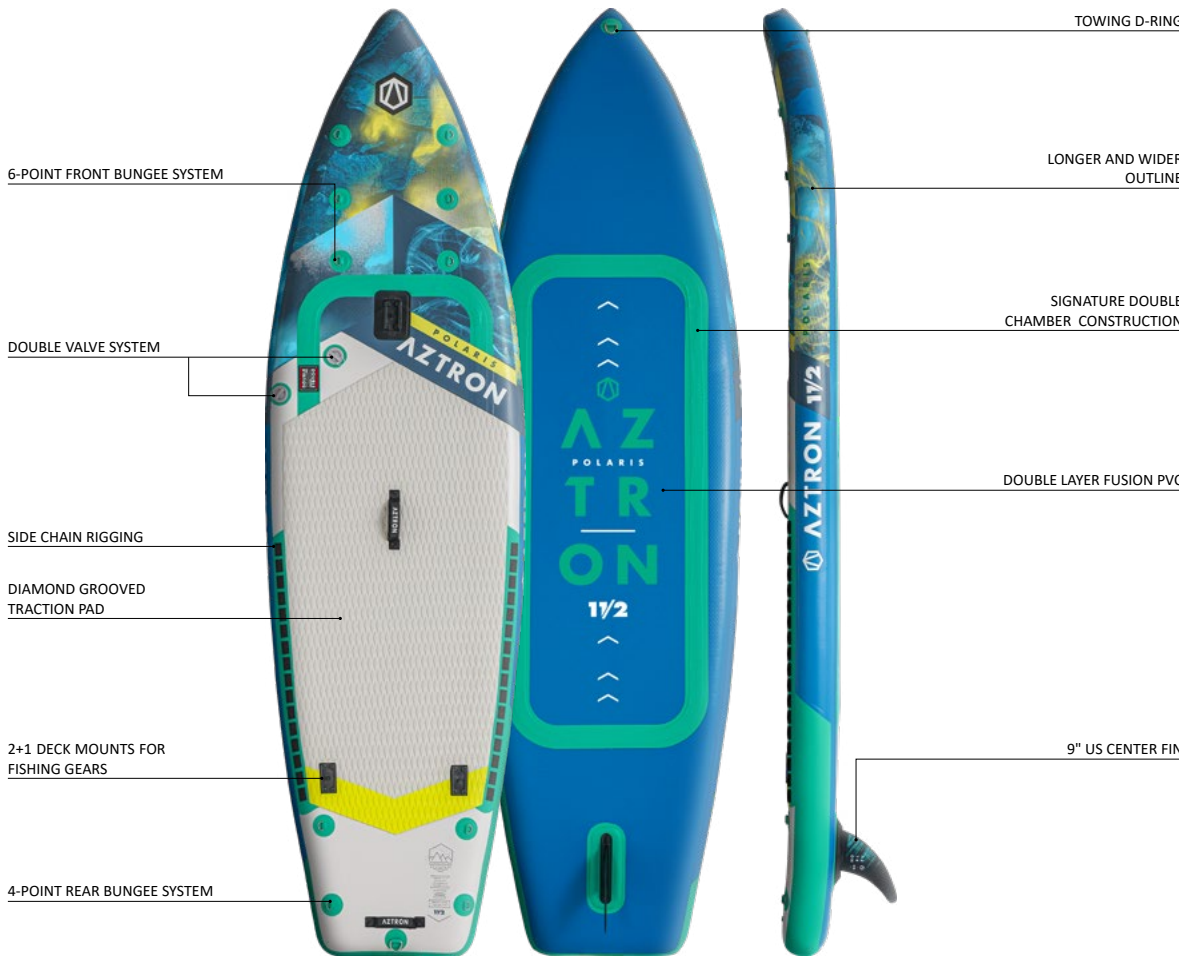

From streams to waves to white water rapids, SIRIUS 9'6" distinguishes itself as the most versatile board in the Specialty Collection. The extra 36" width and fish tail optimize stability and flexibility. The raised edge on the traction pad gives good stance support in rapid water, while the 4+1 fin system creates options for riders to excel in a wide range of water conditions. This is the ultimate dream board for the experienced adventure seeker.

SPECS/			
LENGTH	9'6" / 289 cm	THICKNESS	6" / 15 cm

METEOR 14'0"

ITEM NO. AS-621WD

Awake your competitive instinct with METEOR 14'0". Built with AZTRON's signature Double-Double Technology and extra narrow width, the rigid board grants efficient strokes and excellent tracking on water. The Double Layer Ultra-Light X-stitching core is 20% lighter than conventional I-stitching material, enables you to carry it everywhere with ultimate ease. For those professionals, this board is your companion to make the ambition a reality.

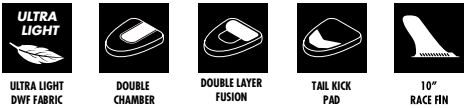

SPECS/	
LENGTH	14'0" / 426 cm
WIDTH	27" / 69 cm
THICKNESS	6" / 15 cm
VOLUME	318 L

METEORLITE 12'6"

LENGTH	12'6" / 381 cm
WIDTH	26" / 66 cm
THICKNESS	6" / 15 cm
VOLUME	280 L

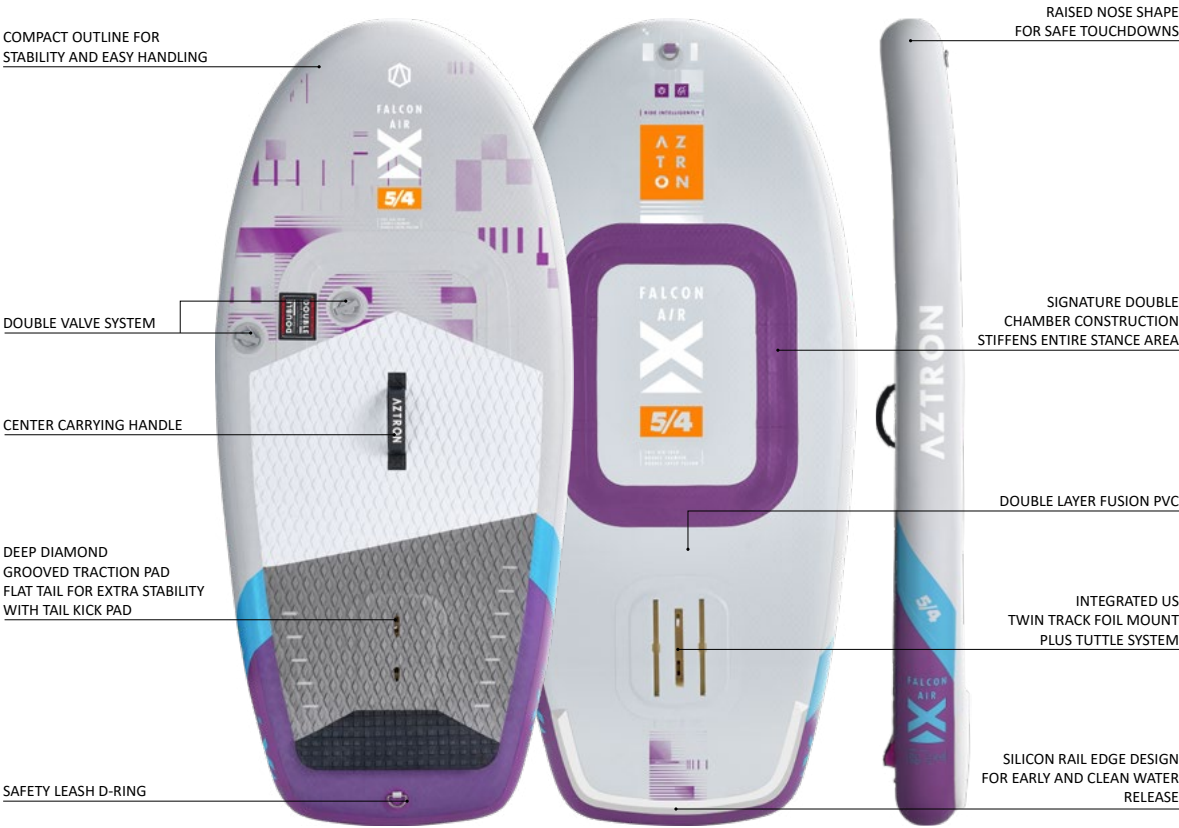

FOIL
COLLECTION

FALCON AIR 5'4"

ITEM NO. AS-200F

Designed for maximum freedom, the new FALCON AIR X allows you to experience both the freedom of flying and easy packing. With high-grade core material and Double Chamber setup, the new board perfectly combines stability, glide and comfort. Featuring a compact length at 5'4", and a wide deck, it balances a nice weight with high performance and handy control in take-offs and in air. Available in three favorite shapes and sizes from 5'4" to 7'6" – the FALCON Air collection offers an easy entry to lead your foiling to the next level.

SPECS/			
LENGTH	5'4" / 163 cm	THICKNESS	4.75" / 12 cm
WIDTH	27" / 68.58 cm	VOLUME	105 L

AIR X 5'10"

ITEM NO. AS-211

SPECS/	
LENGTH	5'10" / 178 cm
WIDTH	29" / 73 cm
THICKNESS	4.75" / 12 cm
VOLUME	135 L

AIR 7'6"

ITEM NO. AS-215

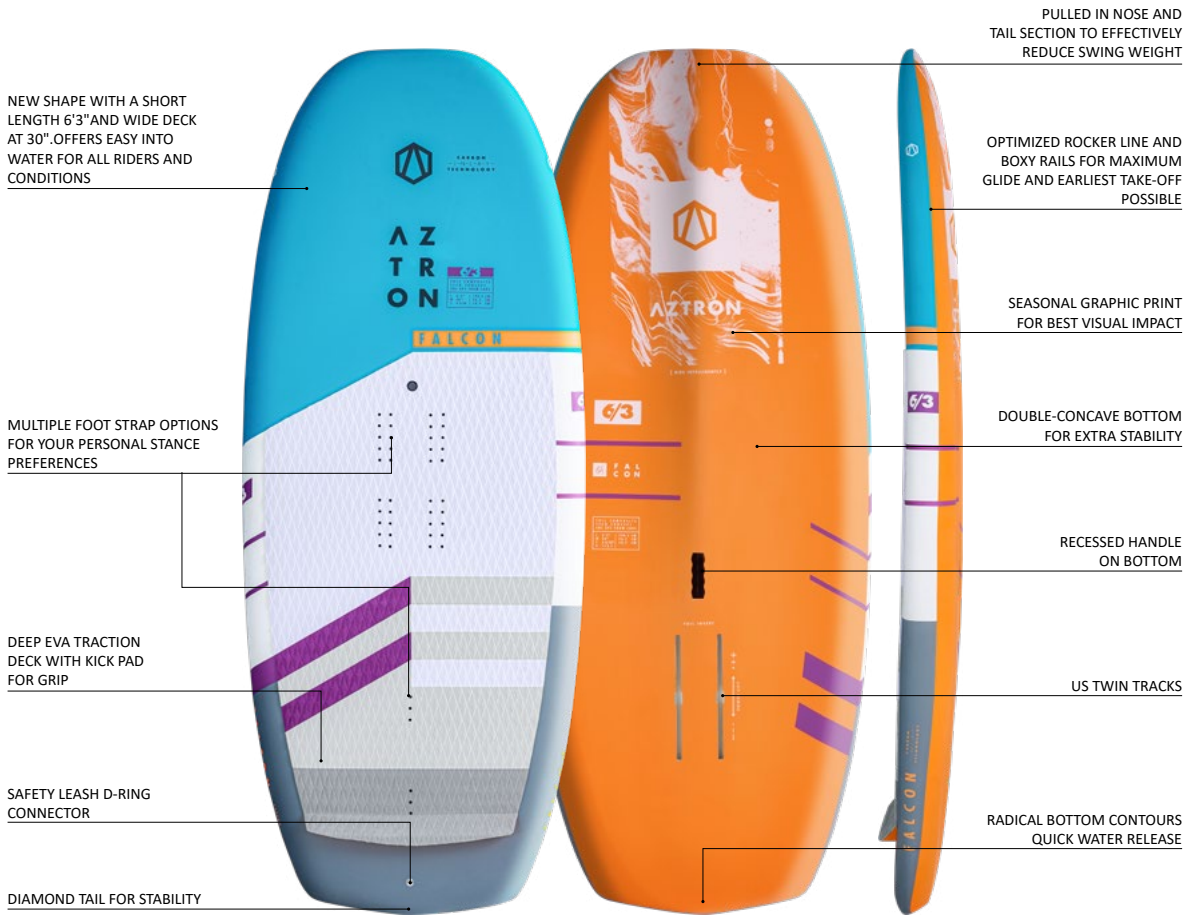

SPECS/	
LENGTH	7'6" / 228 cm
WIDTH	31" / 79 cm
THICKNESS	4.75" / 12 cm
VOLUME	175 L

CARBON X 6'3"

ITEM NO. AH-230F

Our new FALCON carbon board models grow to three dedicated shapes and sizes, taking the performance seriously. The brand-new Carbon X 6'3" is the new version of the previous 6'6". With a shorter length and generous deck, this superlight carbon board is especially designed to be fast and in control, on the racecourse and in the air. We've added all the new features such as the necessary bottom handle, multiple footstrap options, and double concave bottom to push the performance to limits. The 6'3" is dedicated for those venturing into the excitement of Wing Foiling.

SPECS/			
LENGTH	6'3" / 163 cm	THICKNESS	4.3" / 10.9 cm
WIDTH	30" / 76.2 cm	VOLUME	140 L

CARBON X 5'0"

ITEM NO. AH-221F

SPECS/	
LENGTH	5'10" / 178 cm
WIDTH	30" / 76.2 cm
THICKNESS	4.3" / 10.9 cm
VOLUME	115 L

AIR WINGS

INNOVATION TECHNOLOGY

ULTRA- LIGHT DACRON CANOPY

This season, the canopy material receives a major upgrade that adds more muscle and durability. The new and ultra-strong 2.0 canopy features massively improved tear resistance in both directions, and causing a tight canopy tension with minimal flutter and a stable draft position.

RE-SHAPED WINDOW PANELS

The newly designed window panel with re-positioned layout improves the rider's field of vision - allowing you to see what's downwind of you before transition. The reduced clear window also helps to offer a lightweight and forgiving ride.

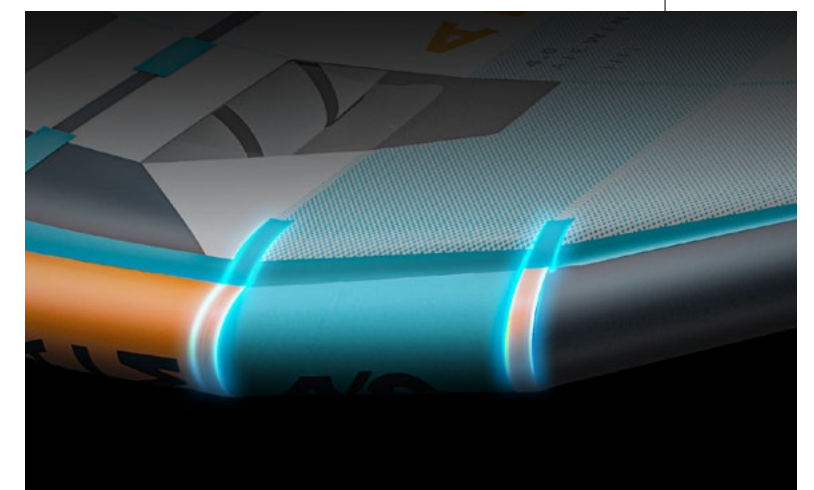

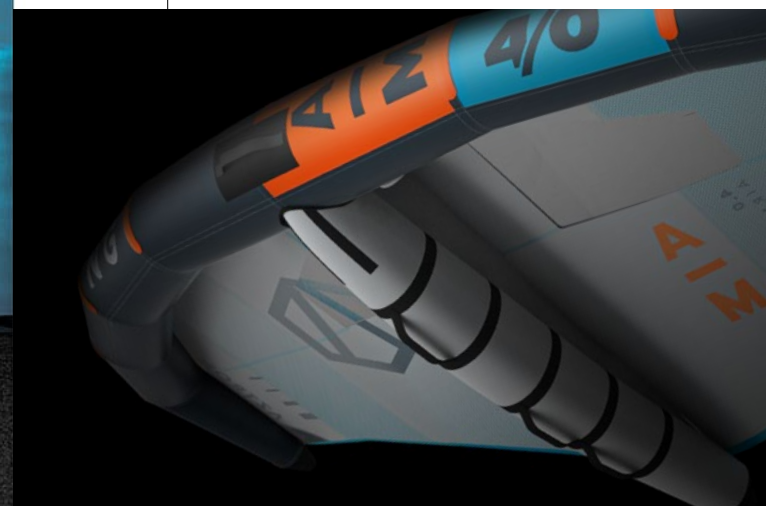

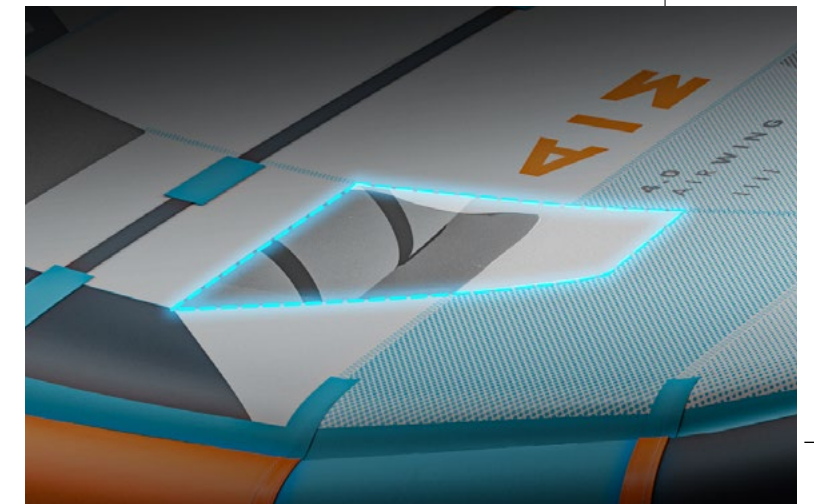

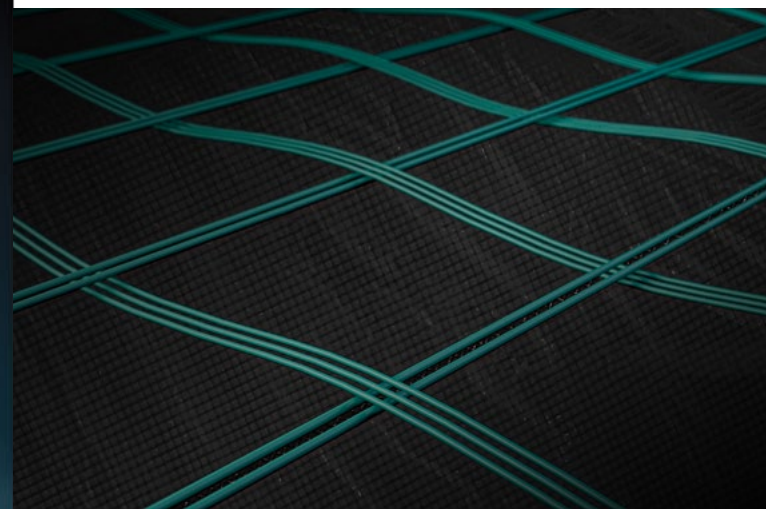

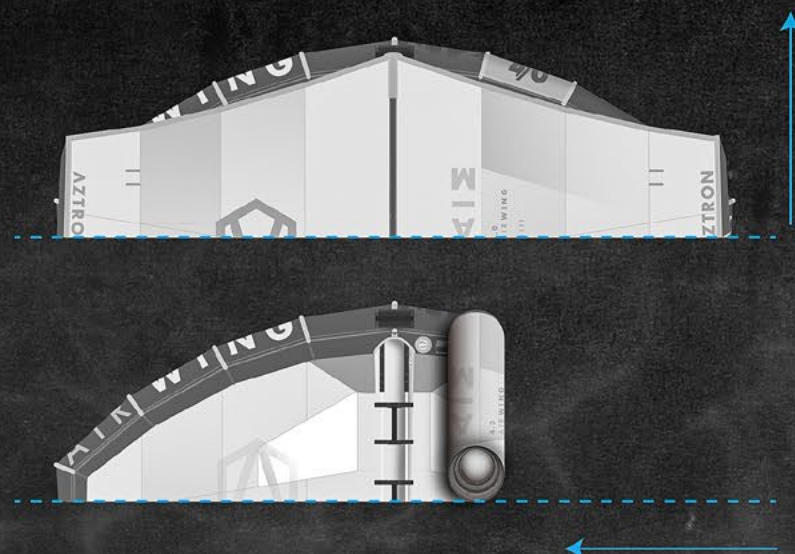

RIGID AND GRIPLOCK HANDLE

Maintain a solid and firm connection to your air wing with the AZTRON ergonomic griplock handles. The lightweight and rigid handle design promises boom-like comfort and an easy control. With our softer, lighter and comfortable handles, you won't exert yourself, nor damage the canopy while packing your gears.

DOUBLE SEAM TAPE REINFORCEMENT

The segmented front tube with reinforced Double Seam tape on top improved stiffness in the center panel and better flex behavior. Additional traction pad also added to the wing tip to give ultimate protection.

Thanks to the ultra-lightweight canopy, it is easy and fast to set up and pack down small which makes it an ideal travel companion. The upgraded AZTRON backpack makes packing and carrying your air wing as easy as it gets.

SOAR

ITEM NO. AFW-410

The new Air Wings has arrived for the 2023 season! Designed to make foiling more effortless than ever, our team worked hard to redesign the wings. Compared to the previous version, we break the wings into two ranges - SOAR 3.0/4.0 and AIM 4.0/5.0/6.0 to the collection. The SOAR 3.0 and 4.0 are created specifically for entry level riders who pursues for stable and effortless drift. With improved wingspan and design technique, it surely delivers a smooth and fun ride. Using the latest version of Ultra-Light canopy and reinforced tapes on the rails sets a whole new standard in lift, flex and response. For all those new to the world of foiling, spread your wings and enjoy the taste of freedom!

AIM

ITEM NO. AFW-450

The design goal of the new AIM wing was simple, a high performance wing structure with innovative material technology and improved design such as increased segments, upgraded fabric and better wing span for free riding, cruising or rotational freestyle moves. The new canopy fabric delivers better tension for power generation. Combined with the reinforcement on the strut and rails, it creates more lift for hang time in jumps and easier handling in maneuvers. The slightly reduced window layout leads to weight saving without compromising safety and comfort. The result of all these great features is a new wing that will impress you from the first flight.

ROCKET FOILS

The ROCKET High Aspect range 1450H and 1800H are full carbon high performance foils designed to be the fastest and most efficient foils for upwind and downwind. In this new season, the 1450H has undergone a radical evolution - a higher aspect ratio front wing, combined with a more powerful profile ensures maximum efficiency. Additionally, we have also changed the fuselage to a shorter and thinner style and made it tight fit onto the wings. All these changes have allowed us to improve literally all of the characteristics of the original ROCKET 1450. Here comes the new foils that granting more sky time and more display of impressive tricks.

ROCKET FOILS

The ROCKET 1650 and 2000 show incredible maneuverability and maximum stability at high speed, making it a true companion for the riders in the early and progressing foiling stage. The fuselage and base plate were re-engineered for the new season. Combined with the advanced prepreg carbon construction, the overall setup promises the lightest combination with maximum of control and highest speed. As the larger size in the range, the ROCKET 1650 and 2000 guarantee great stability and a smooth and comfortable riding experience.

CARBON KEVLAR

Carbon Kevlar is our high-end technology for our performance composite boards. It contains 100% 3K twill weave carbon fiber that delivers excellent balanced weight, strength and impact resistant characteristics. The AZTRON CST-Carbon Sandwich Tech offers an impeccable weight to stiffness ratio. The 45-degree woven fiber brings ultra-crisp and responsive flex, creating the skeleton structure to strengthen the entire board.

NATURAL BAMBOO VENEER

Bamboo has the highest strength to weight ratio of any natural fiber. It is a light weight material and remains extremely buoyant while under weight. The bamboo material makes a durable and fluid ride. It is also eco-friendly since bamboo grows strong and rapidly over a short amount of time.

SUPER LIGHT EPS FOAM CORE WITH WOOD INSERTS

Expanded Polystyrene (EPS) is a light weight cellular plastic material consisting of small hollow spherical balls. The material features extremely lightweight and increased buoyancy and floatation. Most of our boards are constructed with a medium density (20kg/m³) EPS core and premium plywood stringers to deliver a lighter, yet stronger board that feels fast and responsive.

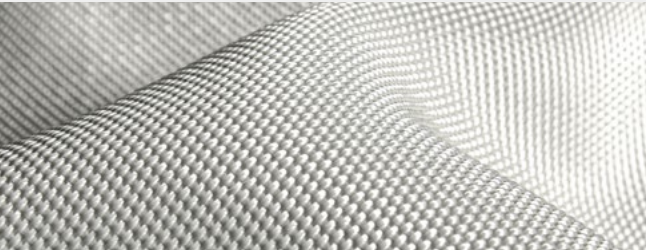

IXPE DECK

The IXPE material we've applied on the Soft-Top surfboard range and bodyboards is a higher density material. The advantage of IXPE is that due to its high density, it effectively adds rigidity and enhances the overall strength of the board. It also provides superior water protection to the surfboard or bodyboard and gives rider a smoother riding surface.

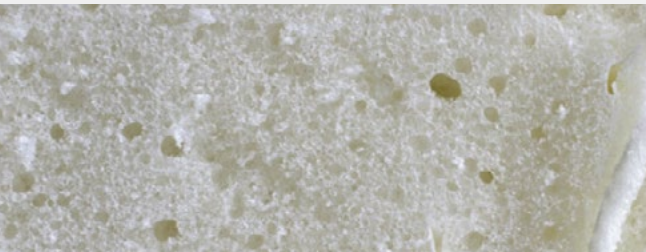

CARBON INLAY TECHNOLOGY

Carbon Inlay is another ideal budget friendly option to give the board with optimum flex and performance. Built with top quality carbon fiber sheet, the solid yet lightweight construction promises best weight to stiffness ratio and gives impressive performance.

UNI-DIRECTIONAL EPOXY GLASS

The Epoxy Glass is used in most of our composite boards. This advanced material features 4 to 6 oz. of uni-directional glass fiber for extra strength in various water conditions. Unlike the multi-directional short glass fiber, the uni-directional epoxy works continuously along its uninterrupted length to provide stiffness. Oriented at 45 degrees, the epoxy resin makes the board stiff but still flexible.

PU SURFBOARD CORE

Polyurethane (PU) core technology is well proven and tested over decades. PU foam core gives an unmatched flexibility and is so versatile for its application. PU core is usually heavier than the EPS core, but it is reliable and it is what most of the pros use. The LYNX 8'0" long board is built with the PU core and glassing with Epoxy resin.

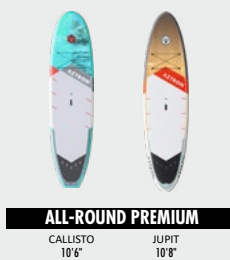

HDPE SLICK BOTTOM

High Density Polyethylene (HDPE) is a stiff slick back layer on the bottom of the soft-top surfboard range and bodyboard. Not only does HDPE slick add strength to the board, it also delivers a resistance free riding surface to enhance the performance characteristic, such as speed, agility and overall maneuverability on the wave.

MARTIAN2.0 14'0"

ITEM NO. AH-812

As its name suggests, MARTIAN embodies AZTRON's imagination and ambition. In this new season, MARTIAN 2.0 has radically evolved to an authentic race SUP . The standard race size combined with the advanced CST Carbon Sandwich Tech enables unmatched tracking and superb speed. Let the boldly themed MARTIAN 2.0 unlock your racing spirit within!

EUROPA 12'6"

ITEM NO. AH-631

Perfect on flat-water, EUROPA offers a refreshing experience through its exquisite design and style. Eco-friendly bamboo veneer reinforced by premium fiberglass create a board with unforgettable elegance. Equipped with front and rear bungee system and an integrated camera mount, explorers can now venture forward with everything they need and capture unforgettable moments of their journeys.

SPECS/			
LENGTH	12'6" / 381 cm	THICKNESS	7.5" / 19 cm

APOLLO 12'6"

ITEM NO. AH-621

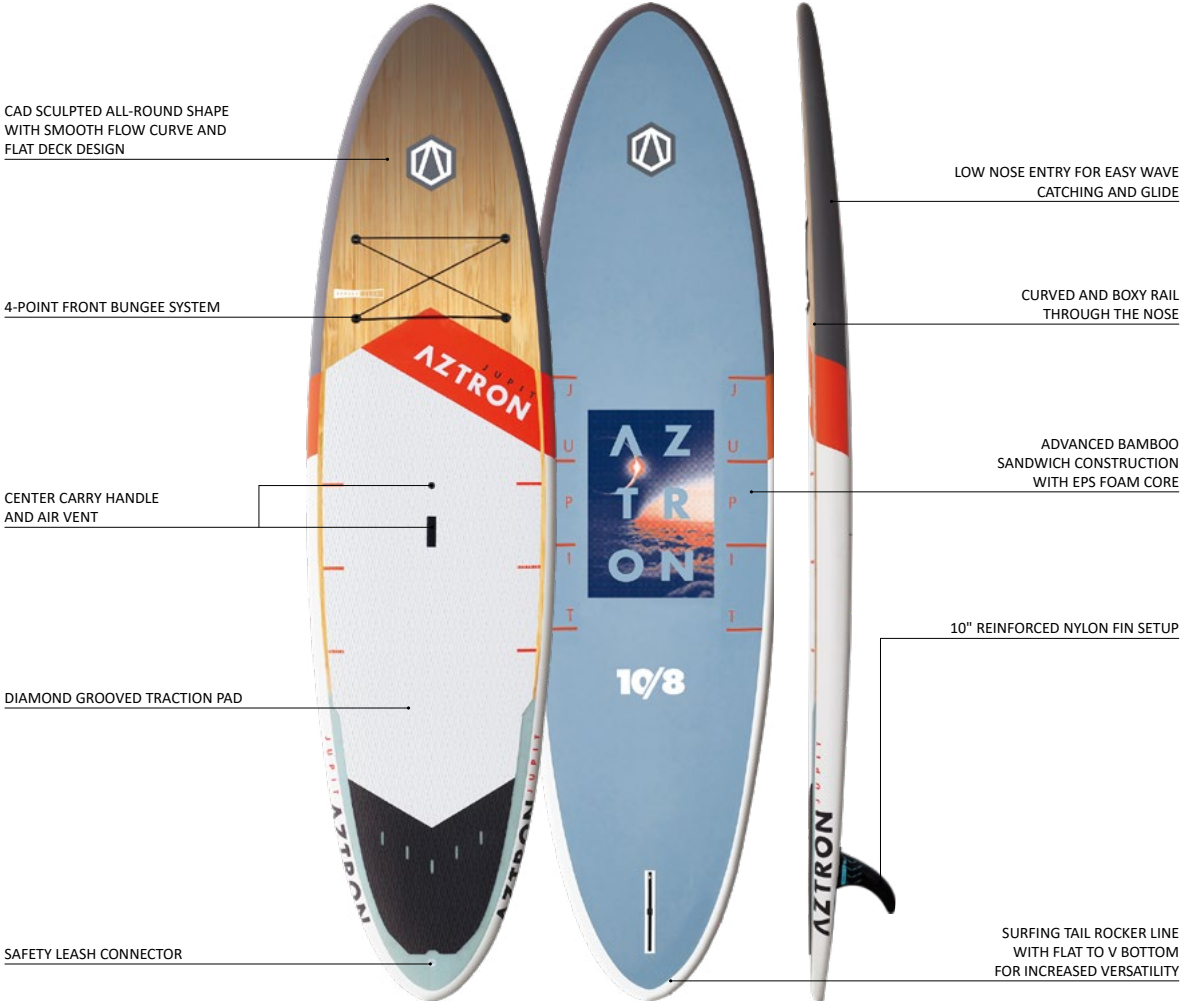

Built with sleek touring shape, APOLLO 12'6" boasts excellent performance in long distances or fast-paced paddling. Epoxy construction offers optimal durability and strength. Wider outline and flat tail add extra stability to the board — highly useful for progressing riders. Performing marvelously well on all kinds of water conditions, APOLLO is, beyond a shadow of doubt, the most classic piece in the collection.

SPECS/			
LENGTH	12'6" / 381 cm	THICKNESS	7.5" / 19 cm
WIDTH	30" / 76 cm	VOLUME	280 L

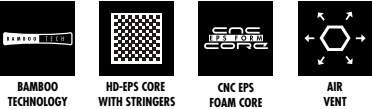

JUPIT 10'8"

ITEM NO. AH-420

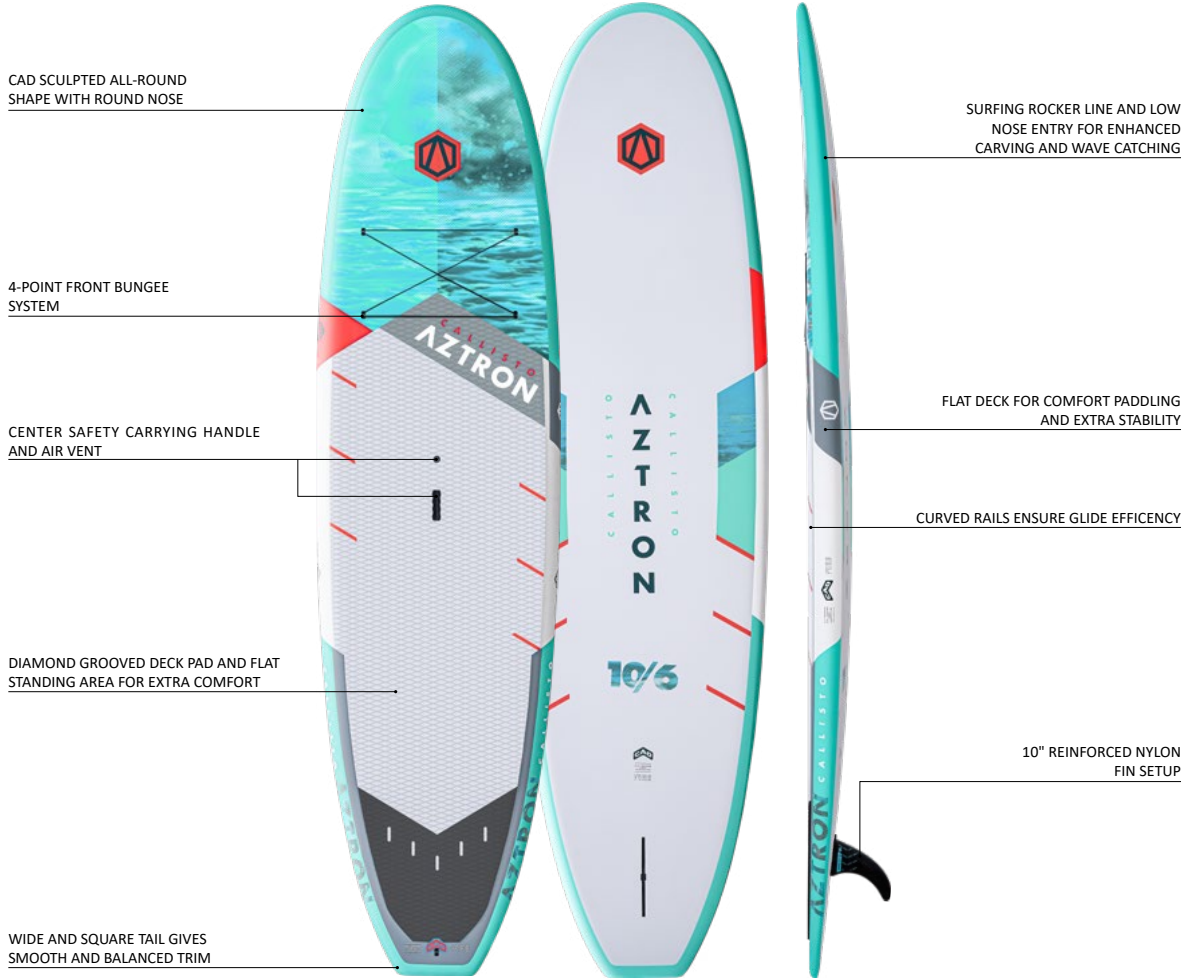

Artistry. Style. Technology. JUPIT brings these innovations into a classic all-round board. The utilization of Bamboo Sandwich Technology ensures stunning optics and delightful weight, and allows the rider to feel the flow more subtly through the naturally flex and long continuous fiber of bamboo. The all-round shape is undemanding to maneuver and performs well on all waters. Immerse yourself in nature with a complete ease of mind!

SPECS/			
LENGTH	10'8" / 325 cm	THICKNESS	4.6" / 11.75 cm
WIDTH	32.5" / 82.5 cm	VOLUME	210 L

CALLISTO 10'6"

ITEM NO. AH-460

Made for the ultimate smooth riding experience, CALLISTO is the top-pick for pros and progressing riders alike. Epoxy reinforced construction combined with double wooden inserts generates the desirable stiff-flex balance for control and response. This board is good for carving and let you easily switch between the quietude of flat water and the fun of small waves.

SPECS/			
LENGTH	10'6" / 323 cm	THICKNESS	4.75" / 12.6 cm
WIDTH	31" / 78.7 cm	VOLUME	178 L

ECLIPSE 11'0"

ITEM NO. AH-323

If you are looking for a board that is long-lasting and budget-friendly, ECLIPSE is your wish coming true. Ultra-light Soft-Top Tech and high-density Polyethylene bottom forges durability in and out, granting optimal comfort and slick tracking. All-round outlines fused into the most stable longboard shape makes the board incredibly forgiving on various water conditions. Available in two sizes, this board is made for all kinds of fun and particularly suitable for clubs and schools.

7-LAYER CONSTRUCTION
All AZTRON surfskate boards are all constructed with 7-layer wood. It is built with either 100% Canadian Maple or MST (Maple Sandwich Tech) which has 5-layer birch with two layers of Canadian Maple for added strength and low flex.

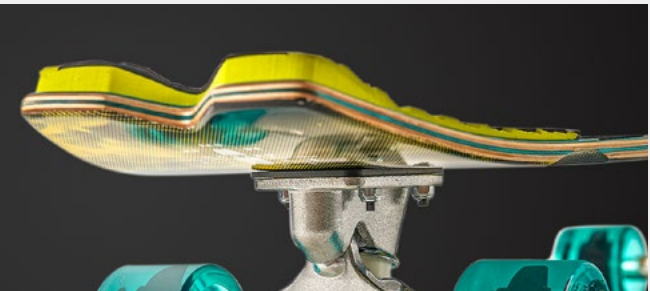

CARBON INLAY TECHNOLOGY
Carbon Inlay is another ideal budget friendly option to give the board with optimum flex and performance. Built with top quality carbon fiber sheet, the solid yet lightweight construction promises best weight to stiffness ratio and gives impressive performance.

100% CANADIAN MAPLE
Canadian Maple is a strong and proven material used in the world's best skateboards. We source only the finest veneers found in Eastern Canada. All AZTRON boards are built with the Canadian Maple timber and wrapped in amazing artwork and grip tape.

COLOR INSERT DECK
All AZTRON skateboards are customized with a single or double sandwich color insert ply for unique characteristics and maximum visual impact.

EVA TAIL KICK PAD
Inspired from surfboard, we integrated the soft EVA tail kick onto some of our boards. It features a deep diamond grooving foam pad to lock your toes and heel in quick turning and making stops. The tail kick also resulting in better control and drive. *Available for STREET, OCEAN, FOREST and SPACE.

HIGH WHEELS
You can choose 70mm or 65mm for wheel options. The 65mm/78A smaller wheels with angled profile help you slide easier and move faster. These agile wheels work better for pumping and carving or transitions in the bowl. The larger 70mm ones are smoother and work better on the road.

ATOMIC TRUCK
The ATOMIC truck system is a responsive, sharp turning and surf carving machine. Built with a spring-loaded surfskate truck, it works by a spring inside it and by compression. It is perfect for riders to practice surf maneuvers such as bottom turns or cutbacks.

SX 4.0 TRUCK
The SX 4.0 truck features a set of spherical wave cams that translate axle rotation into increased force by compressing a solid compression spring. It allows for tight turns and incredible speed when cruising.

IN.SCAPE 32

ITEM NO. AK-402

This is a one-stop board designed to serve full-level surfskaters. With a medium recessed deck guarantees a firm grip of the ground and superb stability during the ride. Diamond-shaped tail and highly responsive ATOMIC trucks allow the riders to perform more radical maneuvers and polish their skills, while the high rebound wheels render great carving experiences. IN.SCAPE is a board that provides loads of fun and keeps your feet on solid ground. Meet the IN.SCAPE 32 with stunning artistic design for the new season and all the features you're looking for in a surfskate.

PADDLES

LAND PADDLE & ENTRY LEVEL

The LAND paddle has been a huge hit since its launch in the last season. Featuring a sturdy and flexible carbon and fiberglass shaft and a customized rubber pusher tip, The LAND paddle offers amazing longboard style paddling that gives you a full-body workout. As the entry-level SUP paddle, the STYLE is designed for every rider to have a go. Its slimmer and stiffer blade creates an efficient water flow, plus an anti-slippery T-bar handle, making this paddle an ideal choice for novice SUPers.

YOUTH & ENTRY PERFORMANCE

The NEO Youth Paddle is designed to serve the next generation riders from entry to progressing level. Built with durable fiberglass epoxy with an adjustable shaft, this is a paddle that is light in our young riders' grip and grows with their level and needs. MACH is an combination of stiffness and comfort, an entry level paddle that grants great performance. The shaft is full fiberglass with 15% uni-directional carbon, forging a paddle that is extremely flexible yet gives easy stroke flow.

ADVANCED

The freeride and cruising series features two of our most popular paddles: REBEL and SPEED. REBEL fiberglass paddle is the standard paddle for the Touring air SUP range. Designed with a larger blade shape and a rigid spine positioned in its middle, this paddle aims to speed the water flow for every stroke. SPEED is built with high-quality Carbon Hybrid technology for a decent rigidity with uncompromised flexibility. The versatility of a tear drop blade shape boasts great performance on flat water and in rapids.

HIGH PERFORMANCE

POWER CARBON 70

The POWER Carbon 70 paddle is designed with pro-outline and 3K prepreg carbon construction. Engineered with the Deep Power Concave (DPC) Tech, the ERA race blade aims to optimize all phases of stroke for a fast and effortless handling. Thanks to the super light carbon material and anti-twist shaft system, this paddle is incredibly lightweight, powerful and responsive. The adjustable 2 or 3-section shaft offers an option for riders to use in all settings. The POWER comes in a stylish graphic and colour combination to deliver a paddle for riders who's looking for flexibility combined with good solid performance support.

TRIPLE ACTION PUMP

ITEM NO. AC-PU180

The AZTRON Triple Action Pump is a purpose-built high-pressure pump designed to easily inflate your iSUPs to pressures up to 20 PSI. The unique structure with two compression tubes is powerful and highly efficient. It has three different operating modes to keep inflation easy at any stage. The Double Action on 2 cylinders helps quickly inflate the SUP up to 5 PSI. The Single Action on 2 cylinders mode makes you inflate to 10 PSI at moderate pace. The Single Action on 1 cylinder boost the last inflation phase up to maximum 20 PSI with less effort. This is definitely a lifesaver for the board setup!

SIZE: 64 x 34 x 10 cm / 25.1" x 13.4" x 3.9"
WEIGHT: 1910 g / 4.21 lbs

MATERIALS

- ABS
- Nylon
- Aluminum shaft

FEATURES

- Triple action
- High capacity (0-4 psi)
- Medium pressure (5-9 psi)
- Max. pressure (10-20 psi)
- 2*3200 cm³
- Air hose 128 cm / 4.2'

DOUBLE ACTION PUMP LITE
ITEM NO. AC-PU113

SIZE: 55 x 25 x 8 cm / 21.7" x 9.8" x 3.1"
WEIGHT: 1081 g / 2.38 lbs

LENS TECHNOLOGY

THE AZTRON SUNGLASSES TECHNOLOGY IS DESIGNED TO FILTER OUT 99% OF REFLECTED GLARE MINUS THE HAZE AND DISTORTION.

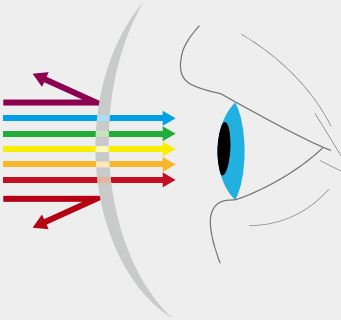

POLARIZED MIRRORED LENSES

The AZTRON Polarized lenses are specially for outdoor and watersports. Featuring a 100% UV protection with UV 400+, these two-toned mirrored lens color blend perfectly with the multi-layered coating.

UV PROTECTION

Absorbing as much as 400 nanometers of solar radiation

PROTECTION INDEX

Category 3 (strong sunlight) allows a luminous transmittance of 8%-18%, optimum for the beach and the sea. Let only the “right” light in.

CONDITION	CATEGORY	TRANSMISSION
	0	80 - 100%
	1	43 - 80%
	2	18 - 43%
	3	8 - 18%
