THE FUTURE IS NOW
The ocean is calling. Follow your dreams and never give up.

THE FUTURE IS NOW
The ocean is calling. Follow your dreams and never give up.

TOMORROW'S ADVENTURE STARTS TODAY

As we break beyond the horizon and ride into the future, we invite you to answer the ocean's call. AZTRON embodies the spirit of limitless possibility, pushing boundaries with every innovation. Our designs inspire adventurers to step into the unknown and seize the future that awaits. The ocean beckons, and the future is within your reach—AZTRON is here to guide you on that journey. Embrace the adventure and shape your tomorrow—The Future is Now.

ONE COMMUNITY

We are more than just a watersports brand – we are a community of innovators and adventurers, united by unyielding desire to explore the unknown. Our Aztronauts are the beating heart of AZTRON, enriching each of our experiences through moments of growth and a deep appreciation for the world we explore together. Like the water that connects us all, our community will strive together, support one another, and celebrate the journey along.

TRUE COMMITMENT

We value the bliss of nature and the unyielding spirit of athletes, and we are true to the sport, in every ripple and crest. We find motivation to stroke harder, to push limits, and to exceed expectations. With our true commitment to ride intelligently and safely, coupled with a thirst for improvement and a desire to never stop exploring, we draw inspiration from the aquatic rhythms and unwavering passion, propelling us to the limits.

RIDE FEARLESSLY

Our products stand as beacons of safety, equipped with a series of protection gears and our signature double-chamber technology for air boards. Crafted with innovation and engineered to meet the strictest safety standards, our premium designs ensure that each of the products will empower you to embark on every adventure with confidence. Embrace the open water fearlessly, where nature's splendor and your passion meet in perfect harmony.

2025

TOURING & RACE SUPS

Meet the latest evolution in our 2025 Touring Collection—now crafted with eco-friendly materials and fresh digital graphics for a modern flair. The ultra-light drop stitch core makes it foldable, lightweight, and easy to carry. With double-chamber technology and double fusion layer fabric, it guarantees both strength and safety. The 2025 edition also features an eco-conscious digital print upgrade, adding a contemporary and sustainable touch to its sleek design.

Unleash your competitive edge with the 2025 METEOR 14'0" Race SUP. Featuring AZTRON's Double-Double Technology and a 26" narrow deck, it ensures precise tracking and powerful strokes. The updated model boasts astronaut-inspired graphics and a sleek outline, while maintaining key race features. Its lightweight Double Layer Ultra-Light X-stitching core and durable outer shell combine hard-board toughness with easy portability.

SUP RACE ACCESSORIES

Unveil the future of SUP racing with our 2025 carbon fiber paddles: BOLT and HEAT. Crafted for elite performance, both paddles boast an ultra-lightweight 100% pre-preg carbon fiber construction, delivering exceptional precision and stability for professional racers. The HEAT, designed with juniors in mind, features a smaller shaft and deep concave blade for effortless handling and smooth glides.

APPAREL COLLECTION

Dive into our 2025 apparel collection, now offering a complete neoprene product line for all your water sport needs. For competitive performance, the Race Jersey features a race-inspired design with astronaut artwork, UPF 50+ sun protection, and quick-dry fabric, keeping you comfortable and protected as you push your limits. Perfect for spring and summer, the men's Long John provides a sleeveless design and long legs for optimal mobility, crafted from N-Flex 2.0 neoprene with flatlock stitching for durability and warmth. Complete your look with our Active Floating Eyewear—full shield sunglasses with polarized lenses, a wide field of view, and vibrant gradient colors, ensuring you stay stylish and focused.

WHAT'S NEW

TEAM

Our team riders are the heart and soul of AZTRON. They aren't just athletes; they're adventurers, dreamers, and thrill-seekers, daring to redefine the boundaries of their sports as they ride the waves of triumph. Across continents, they chase new horizons, embrace diverse cultures, and capture stories of the unknown. Our riders represent our brand's heartbeat, radiating our shared vision to the world. The Future is Now - tomorrow's adventure starts today with AZTRON.

SUSTAINABLE FUTURE

At AZTRON, we are more than just a brand. We are a community of responsible adventurers who care about the environment. We know that our actions have consequences, and we are determined to make a positive change for our planet. That's why, in the 2024 to 2025 season, we are launching a series of initiatives to reduce our environmental impact and protect our oceans and beaches. Kicking off our mission, we will switch to recyclable paper packaging for most of our inflatable and composite boards. Next up, we will take part in beach and ocean cleanups with our Aztronauts and partners. Last but not least, we'll lower our carbon footprint by encouraging our employees and partners to choose eco-friendly transportations. We believe that every action counts, and each choice contributes to a cleaner and more sustainable world.

Join our eco-friendly initiatives, and let's make a positive change together.

RECYCLABLE PACKAGING

At AZTRON, we're deeply committed to saving our planet one step at a time. To combat the environmental damage caused by plastic, we're transitioning to eco-friendly packaging for most of our Inflatable and composite boards. Farewell to plastic bags, we're welcoming recyclable paper packaging. Plastic's slow decomposition, ocean pollution, and harm to wildlife are well-documented. Paper, on the other hand, is biodegradable, renewable and easily recyclable. By switching from plastic bags to paper packaging, we are taking a step towards a more sustainable future.

BEACH & OCEAN CLEANUPS

Our next step unfolds: launching beach and ocean cleanup initiatives. We believe that every piece of litter we remove from the shore is one less piece that can harm our aquatic ecosystems. We are dedicated to educating our customers and partners on the importance of proper disposal and recycling of waste materials. By joining our beach cleanup projects, you can help us transform plastic and other debris into useful products, while protecting our oceans and beaches from pollution. Together, we can make a difference and protect the beauty of our planet for generations to come.

REDUCE CARBON FOOTPRINT

We recognize the detrimental impact of carbon emissions on our environment, which threatens the health and well-being of all living beings on Earth. To combat this, we wholeheartedly encourage our employees and partners to reduce their carbon footprints by using more eco-friendly transportations. We believe that every action counts, whether it's opting for public transportation, walking, biking, or driving electric cars, each choice contributes to a cleaner, greener future. Join us in our mission to create a positive impact on our planet and secure a brighter future.

ELITE FUTURE ATHLETES PROJECT

The Elite Future Athletes Project is our call to young athletes across the globe to chase their dreams with fearless determination. We're here to fuel that passion by equipping them with top-tier gear, ensuring they have everything they need to rise and shine. With the Stellar Youth Project, we're empowering the next wave of champions, inspiring them to push boundaries, break records, and light up the future of sports.

We're stoked to shine the spotlight on one of our rising talents, Mohammed Lamghari! At just 17, this wave-crushing phenom from El Jadida, Morocco, is already making a name for himself with TEAM AZTRON. His talent and dedication are evident as he continues to prove his skills on the water. We can't wait to see what the future holds for this young AZTRONAUT as he pushes boundaries and excels in the sport he's born to dominate. Welcome aboard, Mohammed!

Meet Riccardo Piana, a 16-year-old wingfoil and SUP powerhouse from Oristano, Italy. Competing in European championships across both wingfoiling and SUP, Riccardo is quickly establishing himself as a force to be reckoned with in both sports. His relentless drive and natural talent set him apart, and he's just getting started. We're excited to have him as part of the AZTRON family and can't wait to see where his journey takes him! Welcome to the team, Riccardo!

We're thrilled to celebrate our youngest AZTRONAUT- Rodrigo Lopez. With 2 Gold Medals from the 2023 ICF SUP World Championship already under his belt, Rodrigo is proving that he's just getting started. His recent 3rd place finish in the SUP 18 Masculino Podium Sprints at the IV Sancti Petri SUP Race 2024 is another testament to his dedication and spirit.

At AZTRON, we believe that the true value lies not just in the medals won, but in the challenges faced and the perseverance shown. Every competition is a chance to measure our growth, confront our fears, and push beyond our limits. Rodrigo's journey reminds us that success isn't just about the finish line—it's about the heart, grit, and determination we bring to every race.

BOARDS**

INFLATABLE BOARDS TECHNOLOGY / MATERIAL AND STRUCTURE

	AIR COMPACT / SPECIALTY RANGE	TOURING	ALL-ROUND RANGE	RACE RANGE
OUTER PVC SHELL	DURABLE AND LIGHTWEIGHT Single layer reinforced PVC outer shell.	DOUBLE LAYER FUSION Top and bottom of the boards is directly machine heat laminated to the drop-stitch core with high density PVC under controlled conditions. The result gives an ultimate quality, stiffness, bonding and light-weight material. The overall stiffness is increased by 30%.	DURABLE AND LIGHTWEIGHT Single layer reinforced PVC outer shell	DOUBLE LAYER FUSION + CARBON INLAY Top and bottom of the board is directly machine heat laminated to the drop-stitch core with high density PVC under controlled conditions. The RACE range is built with a 3K carbon rail and inlay to further strengthen the outline and rigidity.
DROP-STITCH CORE	 I-Stitching Drop-Stitch core is a standard knitted support fabric with thousands of polyester threads create a super strong and high pressure inflatable material.	 X-Stitching Drop-Stitch core applies on the All-Round, Touring and Race iSUP is an advanced weave pattern provides a unique structure for the polyester yarns. The X-Stitching core offers good strength, and its new weave pattern contributes to lower overall weight by 20% and better flexibility.		
DOUBLE CHAMBER CONSTRUCTION AND AIR DISTRIBUTION	 56cm VS. REGULAR 93cm  <ul style="list-style-type: none">• Inner and outer chamber offers 30:70 air distribution• Gives 60L extra buoyancy of total board floatation	 <ul style="list-style-type: none">• Inner and outer chamber offers 50:50 air distribution• Gives at least 150L extra buoyancy of total board floatation	 <ul style="list-style-type: none">• Inner and outer chamber offers 50:50 air distribution• Gives at least 150L extra buoyancy of total board floatation	 <ul style="list-style-type: none">• Condensed air distribution• Gives 90L extra buoyancy of total board floatation

DOUBLE CHAMBER, DOUBLE SAFETY

Built with two separate air chambers, the AZTRON Signature and LITE dual-chamber construction offers a 30:70 or 50:50 air distribution between the inner and outer chamber. The second chamber offers a secondary floatation for any emergencies while the sidewalls act like I-Beams make board stiffer. The inner chamber is wisely positioned at the standing area and continuing towards the front. This effectively reduces the deflection about 1.5-2cm comparing to other inflatable SUP in the market.

CUSTOMIZED DOUBLE VALVES

All AZTRON's inflatable SUPs are equipped with customized high pressure valves specially designed for the Double Chamber construction. With a relative smaller diameter than regular air valve, the unique AZTRON valve allows you to prevent damages caused by over inflation. The performance yet is not compromised by this special design.

PREMIUM DROP-STITCH CORE

The drop-stitch core is the heart of every AZTRON inflatable SUP. The core is built with two pieces of polyester knitted support fabric with thousands of fine polyester threads. Each base material is about five to ten feet in width about approximately 400 needle heads per piece to finish the setup. Each needle sews a continuous and evenly spaced thread, back and forth between the top and bottom base fabric, locking them into an incredibly strong unit. This innovative process creates a super strong inflatable material.

LIGHTWEIGHT, YET BUILT TOUGH

AZTRON's woven X-Stitching drop-stitching technology provides a advanced structure of the polyester yarns. The new weave has a unique and less knitting method than the traditional I-Stitching. This gives the board more strength, yet not compromising the board stiffness and helping to reduce the overall weight by at least 20%. We applied the Ultra-Light drop-stitch core on the All-Round, Touring and Race Range.

DOUBLE LAYER FUSION PVC OUTER SHELL

The Double Layer Fusion Tech is our premium construction. Featuring a second PVC layer, which is machine welded directly to the drop-stitch core and around the I-Stitching or X-Stitching material. The benefits of the Double Layer Fusion construction when compared to the standard Double Layer Glue construction is a 20-25% reduction in overall weight, and around 25-30% increase in stiffness. Simply the best inflatable technology out there!

CARBON BAND LAYER

A new 3K Carbon Band layer is applied on the deck area of the RACE SUP - METEOR. The innovative Carbon Fiber extra layer offers additional stiffness and performance to the competitive range.

METEOR 14'0"

RACE

Awaken your competitive spirit with the refined METEOR 14'0". Equipped with AZTRON's Double-Double Technology and a narrow width, this board ensures powerful strokes and precise tracking. The 2025 model introduces a sleek outline and new astronaut-inspired graphics, while maintaining essential race features like the 2+1 race-style handles, tail kick pad, and flat nose for flat water racing. Built with a Double Layer Ultra-Light X-stitching core—20% lighter than traditional I-stitching materials—and a durable double-layer outer shell, it combines the toughness of a hard board with easy portability. Designed for professionals ready to turn ambition into reality, the METEOR 14'0" is your go-to race board.

SPECS/		
ITEM NO.	AS-650WD	VOLUME 315 L
LENGTH	14'0" / 426 cm	MATERIAL - Ultra-light DS core
WIDTH	26" / 66 cm	- Double layer outer shell
THICKNESS	6" / 15 cm	- Carbon PVC

RACE TECHNOLOGY

2025 HIGHLIGHTS

- > Updated board outline to offer best performance and maneuverability
- > Narrowed deck from 27" to 26"
- > Flatter tail design and raised side EVA pads for extra stability and helps recover balance with the EVA footpad to push against
- > Stiffer rocker carbon tape allows for significantly better up water diving ability
- > New concept of Aztron Race range visual and customized astronaut print

We are updating the METEOR 14'0" with a new more performance-oriented shape, with a slimmer deck and a narrow yet flat tail - feature silicon rail edges to increase top speed and maximize gliding efficiency. The Aztron signature Race Double-Chamber construction guarantees extra generous buoyancy and ultra stiffness. The Double Layer Fusion premium material technology ensures METEOR is rigid and direct on the water, with a raised center try for super stable stance. Ideal for either flat water or down-winds on open ocean. They are faster than most of the race boards.

FALCON SOFT TOP 5'7"

FOIL / WING / SURF

SPECS/	
ITEM NO.	AH-510SF
LENGTH	5'7" / 170 cm
WIDTH	28" / 71 cm
THICKNESS	3.5" / 8.8 cm
VOLUME	92 L
MATERIAL	- EVA foam
	- Epoxy

The **ROCKET FOIL** collection benefits from a popular outline, higher aspect ratio and surfaces to provide a fantastic and thrilling glide, a progressive and easy take-off, and increased low-end potential. The pre-preg carbon ply integrated into the construction, hence increasing their resistance and stiffness for even more control and stability.

AIR X 5'4"

FOIL / WING / SURF

Designed for maximum freedom, the FALCON AIR X allows you to experience both the freedom of flying and easy packing. With high-grade DS core and Double Chamber setup, the air foil board perfectly combines stability, glide and comfort. Featuring a compact length 5'4", and a wide deck, it balances a nice weight with high performance and handy control in take-offs and in air.

SPECS/			
ITEM NO.	AS-200F	VOLUME	105 L
LENGTH	5'4" / 163 cm	MATERIAL	- DS core
WIDTH	27" / 68.6 cm		- Double layer
THICKNESS	4.75" / 12 cm		outer shell

AIR X 5'10"

FOIL / WING / SURF

The AIR X 5'10" is a more compact version of the wing foil specific board offering an easier entry into the world of foiling. This is an perfect choice for riders who want to enjoy cruising and boost jumps on the water. It offers exceptional comfort, performance, and control that will keep you excited every time you hit the water. It is a great board for light wind too.

SPECS/			
ITEM NO.	AS-211F	VOLUME	135 L
LENGTH	5'10" / 178 cm	MATERIAL	- DS core
WIDTH	29" / 73 cm		- Double layer
THICKNESS	4.75" / 12 cm		outer shell

AIR WINGS

Designed to make foiling more effortless than ever! The The AIM and SOAR air wings are created specifically for all level riders who pursues for stable and effortless drift. With improved wingspan and design technique, it surely delivers a smooth and fun ride. Using the latest version of Ultra-Light canopy and reinforced tapes on the rails sets a whole new standard in lift, flex and response. For all those new to the world of foiling, spread your wings and enjoy the taste of freedom!

AIM 4.0/5.0/6.0

SOAR 3.0/4.0

TECHNOLOGY

ULTRA- LIGHT DACRON CANOPY

The canopy material receives a major upgrade that adds more muscle and durability. The ultra-strong 2.0 canopy features massively improved tear resistance in both directions, and causing a tight canopy tension with minimal flutter and a stable draft position.

RE-SHAPED WINDOW PANELS

The window panel with re-positioned layout improves the rider's field of vision - allowing you to see what's downwind of you before transition. The reduced clear window also helps to offer a lightweight and forgiving ride.

RIGID AND GRIPLOCK HANDLE

Maintain a solid and firm connection to your air wing with the AZTRON ergonomic griplock handles. The lightweight and rigid handle design promises boom-like comfort and an easy control. With our softer, lighter and comfortable handles, you won't exert yourself, nor damage the canopy while packing your gears.

DOUBLE SEAM TAPE REINFORCEMENT

The segmented front tube with reinforced Double Seam tape on top improved stiffness in the center panel and better flex behavior. Additional traction pad also added to the wing tip to give ultimate protection.

ROCKET FOILS (HP)

The ROCKET High Aspect range 1450H and 1800H are full carbon high performance foils designed to be the fastest and most efficient foils for upwind and downwind. The 1450H offers a higher aspect ratio front wing, combined with a more powerful profile ensures maximum efficiency. Here comes the foils that granting more sky time and more display of impressive tricks.

ROCKET FOILS

The ROCKET 1650 and 2000 show incredible maneuverability and maximum stability at high speed, making it a true companion for the riders in the early and progressing foiling stage. The fuselage and base plate were re-engineered. Combined with the advanced prepreg carbon construction, the overall setup promises the lightest combination with maximum of control and highest speed. As the larger size in the range, the ROCKET 1650 and 2000 guarantee great stability and a smooth and comfortable riding experience.

CARBON KEVLAR

Carbon Kevlar is our high-end technology for our performance composite boards. It contains 100% 3K twill weave carbon fiber that delivers excellent balanced weight, strength and impact resistant characteristics. The lightweight 100g carbon is laminated over the standing area and full bottom. The stronger 150g carbon wraps the nose, rail and the gives the best strength ratio and efficient flex.

CARBON SANDWICH TECHNOLOGY

Aztron Carbon Sandwich combines the superior strength and stiffness of carbon fiber and PVC foam. This advanced construction delivers the highest-performance race paddle board with top characteristics.

NATURAL BAMBOO VENEER

Bamboo has the highest strength to weight ratio of any natural fiber. It is a light weight material and remains extremely buoyant while under weight. The bamboo material makes a durable and fluid ride. It is also eco-friendly since bamboo grows strong and rapidly over a short amount of time.

UNI-DIRECTIONAL EPOXY GLASS

The Epoxy Glass is used in most of our composite boards. This advanced material features 4 to 6 oz. of uni-directional glass fiber for extra strength in various water conditions. Unlike the multi-directional short glass fiber, the uni-directional epoxy works continuously along its uninterrupted length to provide stiffness. Oriented at 45 degrees, the epoxy resin makes the board stiff but still flexible.

SUPER LIGHT EPS FOAM CORE WITH WOOD INSERTS

Expanded Polystyrene (EPS) is a light weight cellular plastic material consisting of small hollow spherical balls. The material features extremely lightweight and increased buoyancy and floatation. Most of our boards are constructed with a medium density (20kg/m³) EPS core and premium plywood stringers to deliver a lighter, yet stronger board that feels fast and responsive.

IXPE DECK

The IXPE material we've applied on the Soft-Top surfboard range and bodyboards is a higher density material. The advantage of IXPE is that due to its high density, it effectively adds rigidity and enhances the overall strength of the board. It also provides superior water protection to the surfboard or bodyboard and gives rider a smoother riding surface.

HDPE SLICK BOTTOM

High Density Polyethylene (HDPE) is a stiff slick back layer on the bottom of the soft-top surfboard range and bodyboard. Not only does HDPE slick add strength to the board, it also delivers a resistance free riding surface to enhance the performance characteristic, such as speed, agility and overall maneuverability on the wave.

7-LAYER CONSTRUCTION
All AZTRON surfskate boards are all constructed with 7-layer wood. It is built with either 100% Canadian Maple or MST (Maple Sandwich Tech) which has 5-layer birch with two layers of Canadian Maple for added strength and low flex.

CARBON INLAY TECHNOLOGY
Carbon Inlay is another ideal budget friendly option to give the board with optimum flex and performance. Built with top quality carbon fiber sheet, the solid yet lightweight construction promises best weight to stiffness ratio and gives impressive performance.

100% CANADIAN MAPLE
Canadian Maple is a strong and proven material used in the world's best skateboards. We source only the finest veneers found in Eastern Canada. All AZTRON boards are built with the Canadian Maple timber and wrapped in amazing artwork and grip tape.

COLOR INSERT DECK
All AZTRON skateboards are customized with a single or double sandwich color insert ply for unique characteristics and maximum visual impact.

EVA TAIL KICK PAD
Inspired from surfboard, we integrated the soft EVA tail kick onto some of our boards. It features a deep diamond grooving foam pad to lock your toes and heel in quick turning and making stops. The tail kick also resulting in better control and drive. *Available for STREET, OCEAN, FOREST and SPACE.

SURFSKATE WHEELS
You can choose 70mm or 65mm for wheel options. The 65mm/78A smaller wheels with angled profile help you slide easier and move faster. These agile wheels work better for pumping and carving or transitions in the bowl. The larger 70mm ones are smoother and work better on the road.

MOTION SPRING TRUCK
The MOTION Spring is a responsive, sharp turning and surf carving machine. Built with a spring-loaded surfskate truck, it works by a spring inside it and by compression. It is perfect for riders to practice surf maneuvers such as bottom turns or cutbacks.

SX 4.0 TRUCK
The SX 4.0 truck features a set of spherical wave cams that translate axle rotation into increased force by compressing a solid compression spring. It allows for tight turns and incredible speed when cruising.

WHEELS

What the waves easily take care of takes years of dedication to be transferred to the concrete ground. AZTRON's classic sets of wheels comes in two different types: 65mm/78A and 70mm/78A. The 65mm wheels are designed for the tricks and techniques, while the larger 70mm wheels are created for effortless glides and sharper turns. With wonderful ground traction, these wheels replicate the surfing experience for greater fun!

DAWN 30

BALANCE BOARD / SHORT

Get prepared even when you are out of water. The AZTRON balance board will help you improve core strength, stability, coordination, and reaction time. DAWN is crafted from birch and with a fish tail design which refers to the surfboard. The collection is perfect for balance mode and with adjustable stops between the stops at the back of the board, so you can easily adjust the strength level to train up.

SPECS/	
ITEM NO.	AH-080B
LENGTH	30" / 76 cm
WIDTH	13.5" / 35 cm

PADDLES

BOLT

PRO RACE PRE-PREG CARBON FIXED PADDLE

The BOLT is a revolutionary paddle that fits all racers' need. 100% pre-preg carbon, CNC shaped high density PVC core blade. The pre-preg technology makes the paddle to achieve lowest weight, quickest response and ultimate in performance. The narrow concave V blades are powerful and super stable, offers in 75cm², 80cm² and 83cm² three sizes. They feature a generous ABS edge for protection of your board and the blade, The shaft is 1-piece fixed, aim for professional users' need. The handles are made of 100% carbon.

HEAT

PRO RACE JUNIOR CARBON PADDLE

The HEAT performance junior paddle is built as a top racer paddle with the same Pre-preg carbon fiberconstruction as in our adult pro race paddles. With a smaller 16-26mm shaft diameter and a 72 sq.in deep concave blade, this paddle makes it easier for juniors to handle and glides through water smoothly. Availabe in fixed or 2-section shaft, the all new HEAT delivers performance younger riders need to enjoy their time on the water while providing plenty of stroke.

ATLAS ROLLER BAG 120L

The ATLAS 120L Roller Bag is the ideal companion for your SUP adventures. Aside from the seasonal color and graphics makeover, this bag now features a sturdier wheely structure for smoother transportation. Its spacious interior fits all of your boards, pumps, paddle gear, with separate compartments that help you organize and protect your belongings. Plus, the front zipper bag is a handy addition for storing your essentials. Embark on your journey to new horizons with the upgraded ATLAS Roller Bag!
